Career Objective

Passionate and dedicated Full Stack Developer with 1.9 years of experience building scalable, user-friendly web applications using React.js and the MERN stack. Strong expertise in component-based architecture, state management with Redux and Hooks, RESTful API integration, and real-time notification systems. Committed to delivering efficient, secure, and user-centric solutions in Agile environments.

Experience

1990 Minds & Co, Bangalore *Feb 2024 – Present*
Associate Software Developer (Apr 2024 – Present)
Associate Software Developer Intern (Feb 2024 – Apr 2024)

- **Full-Stack Development:** Developed scalable web applications using the MERN Stack (MongoDB, Express.js, React.js, Node.js) with modern JavaScript (ES6+) and responsive design principles
- **Frontend Development:** Built reusable and interactive user interfaces using React.js with component-based architecture, Redux for global state management, and React Hooks
- **UI/UX Implementation:** Implemented responsive and accessible layouts using HTML5, CSS3, Tailwind CSS, Material UI, Ant Design, and Bootstrap for cross-device compatibility
- **Backend Services:** Designed and optimized RESTful APIs using Node.js and Express.js, ensuring secure authentication, efficient data handling, and improved performance
- **Database Management:** Designed MongoDB schemas and implemented optimized CRUD operations to support application scalability and reliability
- **Authentication & Authorization:** Implemented JWT-based authentication and role-based access control (RBAC) to secure application workflows
- **Messaging Integrations:** Implemented server-side WhatsApp messaging (WATI-style) and SMS services using Fast2SMS to deliver OTPs, transactional alerts, and real-time status notifications from backend systems
- **Notification Workflows:** Built automated notification triggers for events such as user registration, application status updates, and system actions, improving user engagement and communication reliability
- **Feature Development:** Delivered end-to-end features including dashboards, PDF report generation, file uploads, application tracking systems, and notification modules
- **Cloud & Third-Party Services:** Integrated Cloudinary for media storage and Firebase services for authentication, notifications, and auxiliary backend support

- **Version Control & Collaboration:** Used Git and GitHub for version control, collaborative development, code reviews, and maintaining clean commit histories
- **Client Interaction:** Collaborated with clients to gather requirements, propose technical solutions, and deliver features aligned with business objectives
- **Agile Development:** Worked in Agile/Scrum environments, participating in sprint planning, daily stand-ups, sprint reviews, and continuous integration practices
